

FUSESIGN FOR PROFESSIONAL SERVICES

Digital Signing, Done Simply

WHO WE ARE

FuseSign (www.fusesign.com) is a digital signing platform designed and built here in Brisbane, Australia for the professional services industry. Our Business, FuseWorks (www.fuse.work), was built by professionals with backgrounds in accounting who understand the frustrations of document signing. As a result of these frustrations, we developed a solution that provides our clients with the flexibility, ease of use and, most importantly, the security they need to do away with wet signatures and 'one size fits all' alternatives.

OUR PRODUCT

In recent years, accountants and financial advisors have been rapidly adopting digital signing technology. Growing numbers of countries around the world are endorsing the legal validity of digital signing and, in turn, enabling businesses to reduce paper handling, improve productivity efficiencies and reduce their respective costs.

With FuseSign, you achieve greater control over your signing process through the ability to specify document-level permissions for each individual interacting with the document bundle. This means for individual signers you can set whether they can sign, view or not access each document within a bundle, aiding greatly with those large family groups.

SIGNATURES

With FuseSign, you have the flexibility to choose from two convenient signature options:

1. **Typed Signatures:** FuseSign allows users to simply type their name or initials into a designated placeholder. Once entered, the platform automatically formats the text into a professional-looking signature, giving your documents a polished and authentic touch.
2. **Drawn Signatures:** For those seeking a more personalised touch, FuseSign enables users to draw their signature directly on a touch-enabled device. Whether you're using a stylus or your finger, the intuitive interface captures your handwritten signature and seamlessly embeds it into the document, ensuring a truly unique and authentic signature.

OUR SECURITY MEASURES

At FuseSign, security is our top priority. We abide by strict guidelines set out in the Electronic Transactions Act of 1999 which guides our team to continue to ensure the level of security we offer our clients is the best it can be.

1

TWO-FACTOR AUTHENTICATION (2FA)

We provide the option of (and strongly encourage) utilisation of Two-Factor Authentication when sending bundles from the FuseSign platform. This is a globally standard verification measure where your client verifies their permission to access the document bundle through entering a 6-digit code sent to their mobile phone number.

2

DETAILED AUDIT TRAIL

FuseSign collects location data and IP addresses to create a digital audit log against each document bundle so that at any time users can collect and record when, where and how a document has been viewed, when a user has been verified, and when a document has been digitally signed. This detailed audit trail is attached to the back page of each signed document to be stored with the original signed document.

3

TAMPER-PROOF DOCUMENTS

Once documents have been signed by all parties, the PDF will be completed with a verifiable copy the digitally signed document using Adobe Certification (X.509 certificate). Adobe ensures generation of a unique key that verifies that a document has not been modified once signed. Each document will then be stamped with a comprehensive log of all transactions that occurred between each party with assurance of there being no ability to tamper with the completed document/s.

4

GRANULAR CONTROL

Our control feature gives you the ability to send document bundles to as many recipients as you need while having control over who can sign, who can view and who cannot view certain documents.

5

AUSTRALIAN HOSTED

FuseSign uses servers with data centres and all data stored in Australia.

OTHER FINANCIAL GOALS

- ☐ Begin a savings plan for your children's education. Even if you do not currently have children, take advantage of the power of compound interest by beginning a savings plan before children are born.
- ☐ If you need to pay off debt or are trying to beef up your emergency or retirement funds, consider changes to your current lifestyle and surroundings that might help fund these goals.
 - If you have a closet full of designer clothing, bags, and shoes, liquidate them and apply those funds to your long-term goals.
 - If you are overextended by living in a home that is too large or in an area that is exceptionally expensive, consider how a move might improve both your short term and long-term financial picture.
